Body Weight Track — Session 2

Xin Yang

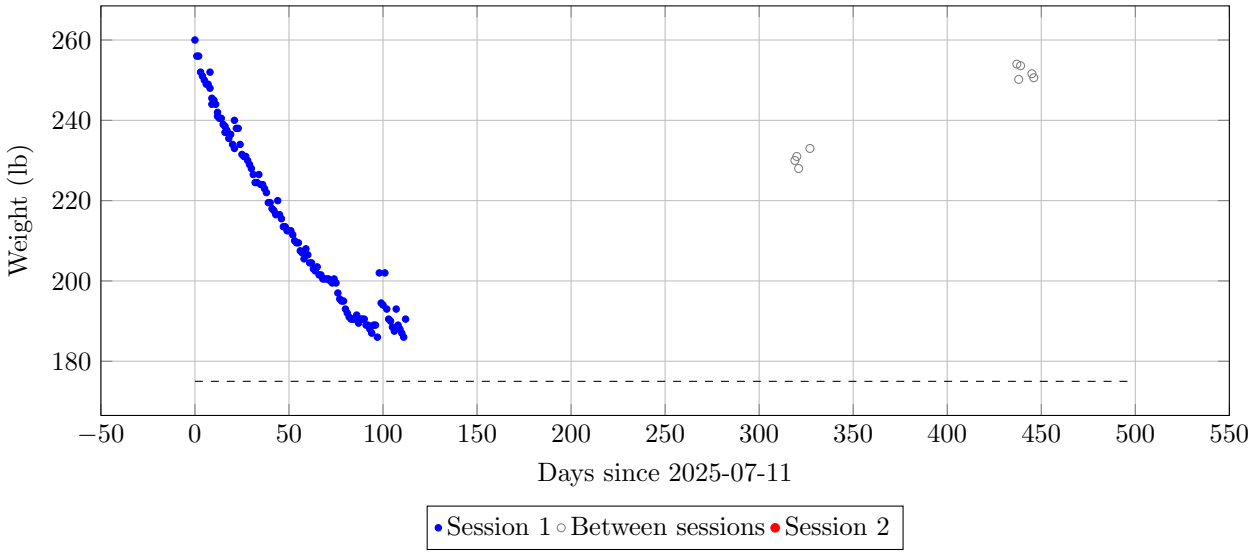

Started 2026-11-12 (updated November 11, 2026)

There is only one heroism in the world: to see the world as it is and to love it.
— Romain Rolland (1866 – 1944)

2 Trend (all sessions)

3 Plan

- **Start:** 2026-11-12. Final target 175 lb.
- **Phase goal:** TBD (weight and date).
- **Nutrition:** TBD (daily kcal, protein).
- **Training:** TBD (days per week, cardio + strength split).
- **Weigh-in:** every morning, fasted, after the bathroom; judge the weekly trend, not single days.

7 Looking back at Session 1

What happened

- 2025-07-11 to 2025-10-19 (extreme diet): 260 lb → 186 lb at the lowest (2025-10-16), −74 lb in about 14 weeks.
- 2025-10-20 to 2025-10-31 (re-feed): 186–202 lb, then tracking stopped.
- 2026-05-26 to 2026-06-03 (a few readings): 228–233 lb.
- 2026-09-21 to 2026-09-30: 250–254 lb.
- Net: about +68 lb from the lowest point within a year.

Questions to answer

1. What made the extreme diet work, and which parts were not sustainable?
2. When and why did tracking stop?
3. What changed in daily life between 2025-11 and 2026-09 (school, job, schedule, stress)?
4. What will Session 2 do differently so the weight stays off after the goal?
